

Values Thinking

*Where do we want to go?
Values Thinking involves justice, equity, and ethics. Respecting how these concepts vary across cultures contributes to solving sustainability problems. We must reflect critically even upon our own values.*

Systems Thinking

*Where are we currently?
Systems are interconnected with each other and each system is composed of other systems. Therefore, decisions that affect one system can have unforeseen and uncertain impacts on other systems.*

Strategic Thinking

*How do we get there?
Systems are interconnected with each other and each system is composed of other systems. Therefore, decisions that affect one system can have unforeseen and uncertain impacts on other systems.*

Futures Thinking

*Where are we going?
There is not just "the future", but multiple plausible futures. Past systems combined with today's visions and decisions will affect which futures we achieve.*
